Contains no sugar, salt, starch, yeast, soy, milk, egg or shellfish.
Vcaps® is a registered trademark of Capsugel. Vegetarian/Vegan Product.

Made in the U.S.A. www.protocolforlife.com

Manufactured by NHG, P.O. Box 2203, Sparks, NV 89431

Other ingredients: Cellulose (capsule), Cellulose, Stearic Acid (vegetable source),
Magnesium Stearate (vegetable source) and Silica.

† Dairy Value not established.

	Amount Per Serving	% Daily Value
Vitamin C (from Threonic Acid Enhanced Buffered Calcium Ascorbate)	500 mg	833%
Calcium (from Buffered Calcium Ascorbate)	59 mg	6%
Choline Bitartrate	100 mg	†
Choline Bitartrate (as Hesperidin)	50 mg	†
Alpha Lipoic Acid	25 mg	†
Acacia Powder	25 mg	†
Rose Hips Powder (Rose canina) (Seed)	25 mg	†
Alum	25 mg	†

Supplement Facts

Serving Size 1 Vcap®

PROTOCOL
FOR LIFE BALANCE™

ProtoSorb C[™] 500

- Antioxidant Protection*
- Buffered, non - acidic
- Enhanced Absorption

10% of profits donated for health research

100 Vcaps®

A Dietary Supplement Vegetarian Formula

SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® daily, preferably with meal. For intensive use, take 1 Vcap® 1-3 times daily, or as directed by a health care practitioner.

Protocol for Life Balance™ ProtoSorb™ C is a patent-pending formulation containing the Vitamin C metabolite, Threonic Acid, which has been shown to enhance uptake of Vitamin C. The buffered, non-acidic Vitamin C supplement is superior as it also contains Alpha Lipoic Acid, an antioxidant known to help regenerate both Vitamin C and glutathione in the body. The addition of Bitartrate salts to the formulation has been shown to enhance the bioavailability of the supplement. Furthermore, studies suggest that Alpha Lipoic Acid may enhance the body's utilization of Vitamin C, especially by activating uptake into cells via the glucose transport pathways. These ingredients work cooperatively with other antioxidants, such as Vitamin E and Coenzyme Q10.*

Vitamin C is required for the synthesis of collagen, a structural component of blood vessels, tendons, ligaments and bone. Vitamin C also is required for the synthesis of the neurotransmitter norepinephrine and of L-carnitine, which is required for the transport of fats into the mitochondria of cells.

Do Not Eat Freshness Packet. Keep in Bottle.

Store in a cool, dry place. Please Recycle.

CODE P0716

VI

Vitamin C is best known as a highly effective antioxidant that can protect the body's cells and molecules from damage by free radicals. Its role as an antioxidant has tended to obscure its other physiologic functions. This vitamin is required for the synthesis of collagen, a structural component of blood vessels, tendons, ligaments and bone. Vitamin C also is required for the synthesis of the neurotransmitter norepinephrine, as well as for the production of L-carnitine, which is required for the transport of fats into the mitochondria for beta-oxidation.*

Protocol for Life Balance™ ProtoSorb™ C is a patent-pending formulation containing the Vitamin C metabolite, Threonic Acid, which has been shown to enhance uptake of Vitamin C. This buffered, non-acidic Vitamin C supplement is superior as it also contains Alpha Lipoic Acid, an antioxidant known to help regenerate both Vitamin C and glutathione in the body. Furthermore, studies suggest that Alpha Lipoic Acid may enhance the body's utilization of Vitamin C, especially by activating uptake into cells via the glucose transport pathways. Either directly or indirectly, Alpha Lipoic Acid aids Vitamin C in reducing oxidized Vitamin E, hence regenerating that vitamin for its various functions. In addition, *in vitro* studies have indicated that Alpha Lipoic Acid helps maintain coenzyme Q10 in a reduced state. The addition of Bitartrate salts as synergists helps to create a well-absorbed, highly effective Vitamin C supplement.*

Cautions and Interactions

Estrogen-containing contraceptives are known to lower vitamin C levels in plasma and white blood cells; and aspirin can reduce vitamin C absorption. May interact with Coumadin; and at high doses may affect some laboratory tests, such as serum bilirubin, serum creatinine, and the guinea assay for occult blood. Possible side effects of Lipoic Acid supplementation are allergic reactions affecting the skin, including rashes, hives and itching. Safety of Lipoic Acid in pregnancy and lactation has not been determined.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
