

No-Flush Niacin

Provides inositol hexanicotinate, a compound of nicotinic acid (niacin) with inositol. Taken orally, it releases niacin slowly, thereby minimizing the likelihood of niacin flush. Though chemically linked to inositol, the niacin in this formulation is highly bioavailable.

Suggested Use

As a dietary supplement, 1 capsule two or three times daily with meals, or as directed by a healthcare practitioner.

DO NOT TAKE LARGE AMOUNTS OF NIACIN (GREATER THAN 1.5 GRAMS PER DAY) WITHOUT FIRST CONSULTING A HEALTHCARE PRACTITIONER.

Keep in a cool, dry place, tightly capped.
