

Ginkgo Biloba contains two groups of active components: Flavone glycosides (unique bioflavonoids) and terpene lactones. The flavone glycosides help protect against oxidative damage to the brain tissues, improve circulation to the brain, and support memory function. The terpene lactones assist in promoting healthy circulation and healthy nerve cells.*

Our Ginkgo Biloba conforms to dosage and mode of administration as established by the German Commission E monograph and contains standardized Ginkgo Biloba (Ginkgo biloba) extract powder from the highest grade whole leaves.†

The Ultimate Extract® process makes our Ginkgo Biloba easier to digest and more available than plain herb powder, resulting in a premium supplement.
