

SAMe

S-Adenosyl Methionine

200

FULL POTENCY

USAGE: Take 1 tablet 1 or 2 times per day on an empty stomach or as directed by your qualified healthcare professional.

WARNING: Individuals using prescribed medications such as antidepressants, including Selective Serotonin Re-Uptake Inhibitors (SSRIs) and MAO Inhibitors should consult a physician before using this product. Individuals with Parkinson's disease, bi-polar disorder or manic depression should not use SAMe. Do not use if pregnant or nursing. Do not exceed recommended intake. May cause gastrointestinal upset in some persons. If you experience discomfort, discontinue use.

Jarrow Formulas® SAMe 200 is foil blister-packed to maximize stability and safety. DO NOT use if outer seal of blister pack is broken.

Full Potency 200 mg SAMe (net yield) is derived from 400 mg of SAMe tosylate disulfate.

For best results, use with Jarrow Formulas® JarroSil®, the biologically Activated Silicon®.

Store in a cool, dry place.
Keep out of the reach of children.

Supplement Facts

Serving Size 1 Tablet
Servings Per Container 20

	Amount Per Serving	% DV
S-Adenosyl Methionine	200 mg	↑
(from 400 mg of SAMe Tosylate Disulfate)		

↑ Daily Value not established.

Other Ingredients: Cellulose, mannitol, glyceryl behenate, magnesium stearate (vegetable source), silicon dioxide, sodium starch glycolate and an enteric coating (modified cellulose, magnesium silicate, triethyl citrate and riboflavin).

Suitable for vegetarians/vegans.

No wheat, gluten, soybeans, dairy, egg, fish/shellfish, or peanuts/tree nuts.

EnteroGuard® is a proprietary cellulose-based, food-grade, pH-sensitive enteric coating that resists stomach acid and disintegrates in the less acidic pH of the upper intestines, where the SAMe is made available for absorption.

Natural SAMe 200

Jarrow Formulas® SAMe 200 provides a full 200 mg SAMe (net yield) from 400 mg of SAMe tosylate disulfate. SAMe 200 is manufactured under low temperature and low humidity and is enteric-coated to ensure a biologically active product.

Contains More of the Active S,S Form

Found in all living cells, SAMe is a metabolite of methionine (an essential amino acid). SAMe is a chiral molecule consisting of two forms: (S,S) SAMe and (R,S) SAMe. The biologically active form is the (S,S) structure, while the (R,S) structure is biologically inactive. Jarrow Formulas® SAMe is made naturally by microbiological fermentation and then specially processed without chemical solvents to preserve 68-80% (S,S) SAMe, the highest active level available.

SAMe has been clinically shown to have the following benefits:

Joint Strength

SAMe supports the production of healthy connective tissue through transsulfuration.* In this process, critical components of connective tissue known as glycosaminoglycans (GAGs), including glucosamine and chondroitin, are sulfated by SAMe metabolites to yield sulfated GAGs, such as glucosamine sulfate and chondroitin sulfate.*

Brain Metabolism

SAMe methylation reactions are involved in the synthesis of neurotransmitters such as L-DOPA, dopamine and related hormones, serotonin, epinephrine and phosphatidylcholine (a component of lecithin).*

Liver

SAMe metabolism supports the synthesis of glutathione (GSH) and glutathione-dependent enzymes (glutathione peroxidase, glutathione reductase and glutathione-S-transferase), which are components of the body's endogenous antioxidant network and important for liver function, including phase II detoxification.*
