

Best Hesperidin Methyl Chalcone, sourced from Spain, is a flavonoid derived from citrus fruits that many experts believe has synergistic activity with vitamin C. Hesperidin may also increase vein and capillary strength.

While hesperidin in its original form is not very water soluble, hesperidin methyl chalcone (HMC) is highly water soluble for greater absorption in the gastrointestinal tract. Like all flavonoids, HMC is an antioxidant. Hesperidin also supports eye health and has blood vessel-stabilizing effects.

Helps protect heart and blood vessels from oxidation*

Supports vascular integrity and helps improve capillary strength*
