RESVERATROL 100™

with **EGCG 100™**

100 mg Resveratrol | 100 mg EGCG

The Essence of Red Wine and Green Tea

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's RESVERATROL 100 EGCG 100 provides optimum levels of the most protective molecules from two of the world's most popular beverages – red wine and green tea. These beverages and the molecules they contain have long been the subject of extensive scientific research. Resveratrol and EGCG (Epigallocatechin Gallate) are now recognized as among nature's most powerful protective molecules and continue to be the focus of important anti-aging research. For centuries, Red Wine has been considered a traditional healthy beverage, but only in recent years has Resveratrol been identified as its most important protective molecule. Fortunately, Resveratrol is now available from a pure, natural, ultra-concentrated source, thus making it possible to offer a product where each small capsule delivers the Resveratrol equivalent of more than 100 glasses of red wine! Resveratrol is a central component of the healthy Mediterranean diet and plays a key role in the French Paradox, where the French possess better heart health than would otherwise be expected. Like red wine, green tea has been an indispensable part of the healthy Asian diet for centuries. Recently, scientists have established EGCG as Green Tea's most important protective compound and responsible for its wide-ranging health benefits. Both Resveratrol and EGCG's abundant clinical science demonstrate beneficial roles in virtually all key body systems, organs and tissues, including the heart, brain, liver, skin, eyes, breast and prostate tissue to name just a few. Best of all, our new Resveratrol 100 with EGCG 100 enables you to enjoy the focused, natural benefits of high levels of two of nature's most protective beverages without consuming a single drop of alcohol or caffeine.
