

Suggested Usage: Take 1 softgel daily with a fat-containing meal.

Lutein is an orange-red carotenoid pigment produced by plants and is present in the diet in colorful fruits and vegetables. In the body, lutein is one of the predominant pigments concentrated in the macula, a specialized area of the eye that is responsible for central vision.* In addition, it is known to be deposited in the skin.* Lutein's functional role in these vulnerable tissues is to protect against sunlight-induced free radical production.*
