

Spirulina Manna™ (*Arthrospira platensis*) is a blue green microalga abundant in amino acids, chlorophyll, vitamins, and minerals. Spirulina, one of the world's first superfoods, was a staple food source for the Aztecs who harvested spirulina from Lake Texcoco in central Mexico, and it is still harvested today from Lake Chad in west-central Africa.

Spirulina Manna contains high levels of phycocyanin, a pigment-protein complex that is found only in blue green algae. Spirulina's high levels of phycocyanin support a healthy inflammatory response, offer potent antioxidant properties, and support kidney health.\* Considered Nature's protein powder, spirulina is 60-70% protein and contains all of the essential amino acids, making it the world's highest known source of complete protein.

"I WISH YOU GREAT HEALTH  
AND HAPPINESS ALWAYS!"
