

Our probiotic strains are stabilized using a patented poly matrix system (patent #6,653,062) that provides 50 billion microorganisms through expiration date when stored at room temperature. Each Bio-Enhanced, Acid Resistant Strain (BEARS) has been specifically designed to survive stomach acid secretions during digestion eliminating the need for enteric coating. Our proprietary blend formula features the most dominant species of microorganisms (Lactobacilli) that nourish and support the vaginal and urinary organs.
