

Cinnamon is a spice obtained from the Cinnamomum genus of trees native to Sri Lanka. The bark of this tree is prized for its potential wellness benefits with use dating back thousands of years. **Ceylon Cinnamon** (*Cinnamomum verum*) possesses plant antioxidants in the form of phenols and flavonoids that provide support against damaging free radical molecules.[†] Ceylon cinnamon is prized for its effect on balancing the body's use of carbohydrate fuel for healthy energy levels.[†]
