CINNAMON 400™

Supports Healthy Blood Sugar Balance and Insulin Metabolism

CINNAMON 400 offers a unique concentrated blend of standardized extracts of cinnamon bark delivering the powerful protective compounds naturally present in this respected spice. For centuries, cinnamon has been sought after, not only for its distinctive flavor, but also for its health-promoting properties. In fact, cinnamon remains one of the oldest herbal remedies used in traditional Chinese medicine. Recently, cinnamon has gained popularity for its ability to help support healthy blood sugar balance and glucose metabolism. Research attributes these benefits to the powerful activity of the Type-A polyphenols present in cinnamon bark extract. Our **Cinnamon 400** delivers a comprehensive standardized blend of polyphenols from three unique cinnamon extracts. As with all plant-based supplements, there is more to making a quality cinnamon product than placing some ordinary, powdered cinnamon into a pill. To receive the benefits of cinnamon, one must always seek standardized extracts of cinnamon bark delivering beneficial levels of their key protective compounds. Our unique, concentrated blend of these distinct standardized extracts of cinnamon bark assures the most comprehensive protection from this remarkable natural ingredient.
