

**SUGGESTED USAGE:** Take 4 capsules daily on an empty stomach. Consult physician if using continuously and at a high-level for more than 60 days.

AAKG (Arginine Alpha-Ketoglutarate) is a metabolic derivative of arginine, which is a conditionally essential amino acid that has a number of vital roles in the body.\* Arginine plays a pivotal role in the urea cycle, helping to rid the body of excess ammonia.\* This amino acid is also important in protein synthesis as well as for the support of healthy immune function.\* As AAKG, this form of arginine is a key player in amino acid metabolism, as well as in energy production.\*
