America's #1 selling trace mineral supplement!‡

ConcenTrace[®] Trace Mineral Drops is an all natural mineral concentrate that's made by using **ConcenFlo[™]**, our proprietary harvesting process. **ConcenTrace[®]** contains over 72 naturally occurring ionic trace minerals from the Great Salt Lake with 99% of the sodium removed.

Ideally, minerals should come from eating a raw food diet. However, even eating a raw food diet isn't enough since researchers have proven that soils have been depleted of minerals. Therefore, if it's not in the soil, it's not in the food. Here's where **ConcenTrace[®]** comes in: Taking **ConcenTrace[®]** every day ensures you're getting a full spectrum of ionic trace minerals, which are the same kind of bioavailable ionic trace minerals that are found in foods!*

Suggested Use: This product is all natural, highly concentrated, contains no added preservatives, flavors, or sweeteners and has a very strong taste. **We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavor.** Begin regimen by taking 10 drops for 3 consecutive days. Each day thereafter, increase serving by 10 drops up to ½ teaspoon (40 drops) once or twice daily. **Children age 2-3:** Take 1 drop for every 5 lbs of body weight.

For regular or sodium restricted diets.

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (2-4 drops per glass) compares to expensive mineral water.

Minor crystallization may occur, but this does not affect the quality of the product.
